

What is tixel®?

tixel® is a novel thermal fractional skin rejuvenation system powered by Novoxel's patented technology.

Treatment is fast with minimal discomfort and pain.

Healing time is short.

Tixel uses natural heat, is sterile, radiation free and eye-safe.

Patient Testimonials

○
"My Tixel treatment was without pain or discomfort, no nasty peeling and I was able to work the following day wearing make-up."

○
"The Tixel treatment was short only about 15 minutes for my hands, face and décolleté."

○
"There were no anesthetics required, I experienced only tiny harmless tingling."

○
"My skin is much more prettier and delicate after treatment with Tixel."
